MixPad S super smart panel A super panel, full house smart

- 1.Subvert the traditional smart panel
- 2.Smart AI voice and APP interaction
- 3.So cool home experience
- 4.Plug & Play (some countries need to rebuild the wall)

All-in-one Panel to Control Smart Devices And Scenes With New Interaction Way.

Smart hub is the gateway of the smart home system, connect multiple devices and build the stable and secure home network.

All-in-one panel to control smart devices and scenes with new interaction way.

Smart hub is the gateway of the smart home system, connect multiple devices and build the stable and secure home network.

New Interaction Experience

Mixpad S combines with the 4 interactive ways of button, touch screen, voice and app Control.
MixPad S creates control rules in different distance, such as far, close, middle, etc.

Indoor Short Range

Perfect combination of buttons and touch screen.

Customized UED suitable for scenes to create excellent in-wall interaction

Indoor Middle Distance

Sensitive and precise voice control

The dual-array microphone and distributed concept enable the voice assistant ready to go at all times.(overseas support Alexa, Google home, siri voice control)

Outdoor Long Distance

Multifunction smart home APP

High sensitive voice recognition by powerful and functional HomeMate Apps.

Comprehensive Compatible With Hundreds Of Living Appliances

MixPad S built in three mainstream communication modules by bluetooth, zigbee3.0 and Wi-fi. It supports the access of hundreds of basic smart electrical products, household appliances, and smart furniture .

Comprehensive Compatible With Hundreds Of Living Appliances

MixPad S built in three mainstream communication modules by bluetooth, zigbee3.0 and Wi-fi. It supports the access of hundreds of basic smart electrical products, household appliances, and smart furniture.

Such as:

TV set, washing machine, air purifier, Sweeping robot,
Water heater
Electric oven
refrigerator
Dryer
Electric drying rack
Electric fan
Air-conditioning fan
Water dispenser

Inheriting The Genes Of Technology Aesthetics Shaping Home Wall Art

Created by the iF Gold Award master design team, MixPad S has won 5 international renowned authoritative design awards. The tough lines outline a minimalist design style and create a brand-new home technology aesthetics for you.

Fully Upgraded Configuration Fully Optimized Performance

Raise the standard of super smart panel again.

Fully Upgraded Configuration

Fully Optimized Performance

Raise the standard of super smart panel again.

Soft horn

1W small speaker, every feedback can be clear and not disturb

Ultra-sensitive light sensing

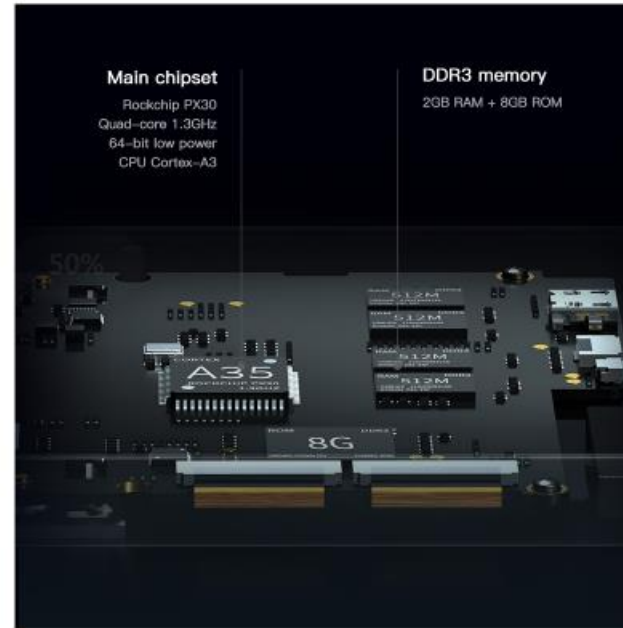

Automatically adjust screen brightness accurately

Refined border technology

V0 grade fireproof material
PC plastic + 30% fiberglass
Three-layer spray of PPG brand rubber paint

Custom 4 inch touch screen

480 * 480P HD LCD display
G + F single-layer five-point touch
AF hydrophobic antifouling anti-fingerprint coating

Temperature and humidity sensor

Built-in imported high-precision sensors can intelligently adjust the temperature and humidity of the environment by detecting a temperature of $\pm 0.5^{\circ}\text{C}$ and an ambient humidity of $\pm 1\%$.

Main chip

Rockchip PX30

Quad-core 1.3GHz

64-bit low power

CPU Cortex-A3

DDR3 memory

2GB RAM + 8GB ROM

Simple & Easy Installation

MixPad S adopts the Chinese national standard single 86 mm size switch bottom box design and supports two-way lighting system, which can directly replace the traditional switches by electrician.

Product packaging

Specifications

Main control: Quad-core ARM Cortex-A35 architecture processor

Storage combination: 2GB RAM + 8GB ROM

Display: 4 inches, 480 * 480P resolution

Touch layer: multi-touch capacitive screen, AF hydrophobic anti-fouling anti-fingerprint coating

Speaker: AAC 1813 speaker

Microphone: dual microphone array, symmetrical noise reduction, 7 meters far-field recognition

Light sensor: Screen brightness adapts to ambient light

Distance sensor: automatic wake-up, 10 ~ 15cm gesture sensing

Body material: V0 fire-resistant PC + 30% glass fiber

Temperature sensor accuracy: $\pm 0.5\text{ }^{\circ}\text{C}$

Humidity sensor accuracy: $\pm 0.1\%$

Power supply: 220V zero fire wire power supply

Number of supported devices: 350

Number of supported scenarios: unlimited

Support network standards: Wi-Fi, Bluetooth, zigbee3.0

Wired network: Ethernet

Zigbee networking: built-in gateway

Functions

Button function customization

Fine control of individual devices

Scene-based multi-device control

Device scene local control

Voice control (Alexa, Google home, Siri)

ZigBee networking

Intelligent temperature and humidity detection

Intelligent detection of ambient light

Outdoor environmental detection

Arming and disarming

Password Disarm
